

SLENDERIIZ

SHAKE IT OFF

PureNourish™, Power Boost™ and Beauty Boost™ are packed with key vitamins and nutrients that are essential to supporting weight loss. When added to your daily regimen, they can reduce your calorie intake while providing vital protein and nutrients to aid your full-spectrum transformation.

These results are not typical. The Slenderiiz Program helps you take in fewer calories than you burn via calorie-restricted eating, healthier food choices and increased physical activity. You can expect to lose up to 12 to 15 pounds in a month depending on a number of factors.

The proof is in the pics.

### ALLERGEN-FREE

Unlike most shake products, PureNourish and the Boosts are entirely free of soy, preservatives, dairy, genetically modified organisms and wheat.

### NUTRIENT-DENSE

When your only focus is cutting calories, you simultaneously cut out lots of key nutrients. PureNourish and the Boosts are more nutrient dense, per calorie, than similar products and have no empty sugars, reducing caloric intake without sacrificing daily dietary requirements.

### POSITIVELY BALANCED

If your body isn't adequately supported by the right blend of nutrients, low-calorie diets can cause fatigue, muscle loss and damage to your hair, skin and nails. The synergistic fusion of PureNourish combined with the Boosts allows you to achieve your weight loss transformation goals without any negative side effects.

# PureNourish™

## HIGH PROTEIN, PURE NUTRITION

PureNourish is a dietary supplement designed to enhance digestion and optimize nutrient absorption. Each serving combines 15 essential vitamins and minerals with 18 grams of high-quality plant protein, a blend of probiotics, prebiotics and enzymes and 25% of your daily recommended fiber in a satisfying supplement shake — plus it's only 116 calories! Using pea protein, rather than animal-sourced protein, enhances digestion and aids optimal nutrient absorption while keeping the sodium content to a low 6mg per serving.

## BLENDED BRAIN POWER

Believe it or not, your brain is actually 60% fat and supported by Omega-3 fatty acid, primarily in the form of DHA (docosahexaenoic acid). Think of it as a charger for your body — it's critical for optimal brain function. This specific type of fatty acid is absorbed by the brain in preference to other fatty acids, making it the best way to boost your brain power.

## RECOMMENDED USAGE

Mix two scoops of PureNourish with your choice of Beauty Boost or Power Boost and 8 oz. of cold water. Shake vigorously to blend. For a creamier shake, use almond or coconut milk.

# Power Boost™

## LOSE THE WEIGHT, KEEP YOUR STRENGTH

Power Boost supports lean muscle mass while boosting mental cognition and promoting weight loss through a blend of L-glutamine (an amino acid found in your muscles) and Neobee® medium-chain triglycerides.

It's blended with cocoa beans, valued not just for their wonderful flavor but also for their high antioxidant content and increased cardiovascular benefits. Coconut oil is also added to provide a rich source of energy that tends to be burned by the body rather than stored as fat.

Use Power Boost as an addition to PureNourish or on its own to help replenish energy and nutrients post-workout.

### What does DHA do?

The human brain is made up of nearly 60% fat. In recent years, we've learned that fatty acids are among the most crucial molecules that determine your brain's integrity and ability to perform. Essential fatty acids (EFAs) are required for maintenance of optimal health but they can't be synthesized by the body and must be obtained from dietary sources. The long chain omega-3 fatty acid, docosahexaenoic acid (DHA), is a major lipid in the brain recognized as essential for normal brain function. The DHA used in PureNourish is sourced from Algae — a vegan source of DHA.

### What are amino acids?

Amino acids are small molecules that are used as building blocks for all proteins, assisting in the creation and growth of muscles, connective tissue and skin.

### What are essential amino acids?

Essential amino acids can't be made by your body and must be obtained through your diet. These are histidine, isoleucine, leucine, lysine, methionine, phenylalanine, threonine, tryptophan and valine.
